

## About

Ace Electronics Defense Systems, LLC is a privately owned, certified SDVOSB defense manufacturing company. Since 2009, we have been a prime contractor supplying platform installation kits, complex electrical cabling solutions, ruggedized assemblies, and electro-mechanical assemblies. Our services include rapid prototyping, reverse engineering for obsolete parts and engineering support. From the beginning, our mission has been to provide our customers with the most cost-effective quality products in a timely manner. This commitment aligns with our goal of achieving and maintaining an excellent reputation throughout the manufacturing industry.

HEMTT

## Differentiators

- Nearly 50 years of combined experience with manufacturing cable assemblies and providing custom solutions
- Engineering-based company which allows us to provide from prototyping to full rate production runs
- A one stop shop for design support, manufacturing & distributing vehicle Integration Kits
- U.S.-based manufacturing facilities located in NJ and MI
- Excellent past performance as a direct defense prime contractor and Tier 1 subcontractor
- A trusted partner who fosters a work culture that emphasizes innovation and the customer first experience
- Expertise as an electro-mechanical integrator focused on ruggedized electronics and control systems

JLTV

## Supported Systems

- Digital fire control solutions for missile platforms & towed artillery
- Manpack tactical radios
- Vehicle-mounted radios & intercoms
- Battlefield command & mounted mission command platforms
- Mounted & dismounted assured position, navigation & timing systems
- Power generation & distribution solutions
- Remotely operated weapon platforms
- C5ISR Integration Kits for tracked & wheeled vehicles

F-35

MLRS

## Products & Services

- Platform Integration Kits: A-Kits & B-Kits
- Cable assemblies with over-molded components
- Cable harnesses for vehicle applications
- Electro-mechanical box builds
- Reverse engineering services
- Design support for circuit card assemblies
- 3D printing for prototype of mechanical parts (form/fit/function)
- Universal mounting systems
- Complex machined parts
- Program, contract, & quality management
- Warehousing & distribution services
- Obsolescence solutions
